### **Works in progress:**

1) **Democracy and Entrepreneurial Opportunity Perception** (I revisited this today and ran some models and found solid results. It was interesting that the results were different if I changed the dependent variable from Opportunity Perception to actual Total Entrepreneurial Activity. It seems that some of the variables impact perception but not activity. However, the level of democracy positively and significantly affects both.)

2) This paper. **The Determinants of Female Entrepreneurial Activity in OECD Countries.**

3) **Freedom Indexes and Female Entrepreneurial Activity in OECD Countries.**
